

# Rolec Quantum

25 YEARS  
OF QUALITY,  
RELIABILITY  
AND  
INNOVATION

The Quantum's design embodies the qualities of our world leading Classic pedestal, complemented by the strength and aesthetics of modern marine grade anodised extruded aluminium.

# Rolec Quantum

- 2.5mm thick high quality 6063 extruded aluminium with a 25 micron marine grade hard anodised protective cosmetic finish
- 2 stage assembly – sections interlock then 2nd fix with M8 Marine stainless cap screws
- Strong and rigid extruded box corners give great strength and resist twist
- Tough 3mm Polycarbonate lens with high impact strength and excellent UV stability
- Heavy duty 5mm Polycarbonate base with high impact strength and excellent UV stability
- Tough Polycarbonate lid and sandwich with high impact strength and excellent UV stability
- Fully segregated electrical, water and LED lighting compartments
- Head assembly built into one part with one seal and assembled internally
- Fail safe lens gasket seal - if the gasket seal is compromised the internal higher wall creates a water labyrinth barrier which prevents water passing over
- Flame retardant to UL94 flame rating at V2
